

Saints Alive

Squeeze

Geneva airport is on the screen
A man is waiting in a limousine
The pretty girl in a safari suit
Runs with The Saint to the hotel room

So let's get it straight for once and for all
It's so crazy that you're always right
And you save me from the rifle sight
And then you take me in the shadows of the night

We're in a night club and the lights are mauve
There's melody on an overdose
Were freaking out to the flashing lights
Here comes The Saint in his suit and tie

So let's get it straight for once and for all
It's so crazy that you're always right
And you save me from the rifle sight
And then you take me in the shadows of the night

Back at the mews with your case of clues
The microfilm has a shot of you
Among the crowd in the discotheque
Kissing the girls don't know what to think

So let's get it straight for once and for all
It's so crazy that you're always right
And you save me from the rifle sight
And then you take me in the shadows of the night
