

## Empty Spaces

SR-71

I'm not afraid to go backwards and fix what we broke  
My gaze falls behind, you make desire seem so easy  
I hold off sleep, it's so silent without you here  
Don't give up now, it would all be for nothing

I believe in second chances  
I believe the years forget

Let me fill these empty spaces  
Better late than never / Stay forever  
Let me fill this empty space  
There's always room for one more mistake

Can you feel that  
I think we're moving in the right direction  
I was someone else then  
I'd take it back if you would let me

We were never this close when we were young  
Every night I whisper your name at the top of my lungs
