## Mosquito

You like when we go fast So my foot's on the brake Used to be my girl But now you're just my worst mistake You don't see it, not a subtle change Makes me laugh you turned into a cliche

Everytime you told me That we'd never say goodbye... was a lie You knew what to expect from me Just like a hit of exctasy You made me high

You think I still want you After all you put me through You think I can't walk away And find someone better for me Just take your overactive ego Shrink it down like a mosquito Baby lovin you was such a chore Til I got bored Now I don't think about you anymore

From the first time I saw you naked I could see the future I knew that my world was shaken Lost my innocence then I lost my mind Thank god now I see Cause with you I must have been blind cause

Everytime you told me That we'd never say goodbye... was a lie Just like a common criminal You gave me just the minimal to Keep me hanging on inside

Now that I can breathe I'm done with therapy It's your turn to burn Covered up in lies And still so full of pride I hope you choke Cause its the sex I'll miss the most
