

## Mess With My Mind

Stabilo

Is it leaving time again?  
Tell me will we ever be back again?  
Down here on the water, in the dark I start to falter  
Break me of my confidence, break my nerve  
Down here on the corner, out on the curb

Take a little time to mess with your mind,  
Or mess with mine and leave me where I stand  
Then walk away from here.  
Just another lonely face out on the block  
I don't ever want to see you talkin that talk  
Take a little time to mess with your mind,  
Or mess with mine you leave me where I stand  
Then walk away from here.  
Just another lonely face out on the block  
You don't ever want to stop and turn away
