

Mess With My Mind

Stabilo

Is it leaving time again?
Tell me will we ever be back again?
Down here on the water, in the dark I start to falter
Break me of my confidence, break my nerve
Down here on the corner, out on the curb

Take a little time to mess with your mind,
Or mess with mine and leave me where I stand
Then walk away from here.
Just another lonely face out on the block
I don't ever want to see you talkin that talk
Take a little time to mess with your mind,
Or mess with mine you leave me where I stand
Then walk away from here.
Just another lonely face out on the block
You don't ever want to stop and turn away
