Save Me

Stacie Orrico

Lately I've been feelin kinda heavy Could it be all the baggage im carrying I had a guy who wasn't right Talk about love and i gotta think twice I mean he really worked a number Up in my mind when I was open Not just my lover, was my best friend But he stole my heart and kept runnin

It's either love or life I want it all But sometimes I may not get all the calls Will you pick me up baby when I fall Keep me safe in your arms I know I might be movin slow We can pick it up later down the road Its a bit difficult to give you control But let's see where it goes

R: Cause I've been lied to, cheated on But you can make it right If you can come and save me, save me So wont you come and save me, save me I can't trust, the truth be told But you can make it right If you can come and save me, save me I'll let you come save me, save me

So far my life has been crazy Like a reality show But baby can you take the drama out my life Make me forget all the tears that i've cried Oh I think I better warn ya What you see ain't just what you gon' get Pieces of me aint right, they're still left Can you pull them together

Its either love or life I want it all But sometimes I may not get all the calls Will you pick me up baby when I fall Keep me safe in your arms I know I might be movin slow We can pick it up later down the road Its a bit difficult to give you control But let's see where it goes

R:

I was trapped within my pain Not long ago It's still hard But I try to do the best I can Understand if my heart breaks again It's already done, its over Cause I know my heart will never mend

But you can make it right Ohhh, oooh

You're gonna make it right Ohhhh yeah yeah

R: (2x)

Your love is saving me Ohhh
