## **Break Away**

Misery The company it keeps Is for me All these things We keep repeating Like a wheel That keeps turning If I could break away From this moment Break away What is real Never showing Break away How I feel If I could break away Apathy The ignorance it brings The tragedy Of all these things We keep repeating Like a wheel That keeps turning If I could break away From this moment Break away What is real Never showing Break away How I feel If I could break away Break away If I could break away Just break away If I could break away From this moment Break away What is real Break away Never showing Break away How I feel If I could break away If I could break away If I could break away
