## Save Me

This dark room, another cigarette The carpet strewn, I'm getting sick of it The end is near, I'm in the thick of it And I'll be there soon if you can handle it

Just save me from all that I am You save me for the fuck of it Save me, just hold out your hand You save me from all of it

I try and speak myself, you can do it too And need no one's help, I'm needing only you So just pray for me and deliver it You never take from me what I'm given

Just save me from all that I am You save me for the fuck of it Save me, just hold out your hand You save me from all of it

And all that I have become is you The only good in me is you And after all of this The day will come to find out Will you take me, oh, forsake me So pray for me, am I forgiven? For what you take from me

Just save me from all that I am You save me for the fuck of it Save me, just hold out your hand You save me from all of it Come, save me

Pray for me, am I forgiven?
