

## Take It

Staind

I feel like this won't go away  
No matter how hard I try to  
Squeeze my eyes shut so I can't see  
This pain in you  
This pain in me,  
In me

Everything that I can say to you  
Won't help you  
Everything you need is right in front of you  
Just take it

I know that I'm really not here  
To represent what I'm not clear  
About in my head  
Sometimes I feel fucked up just like you do,  
Like you do

But everything that I can say to you  
Won't help you  
Everything you need is right in front of you  
Just take it

Try to make it through the daily pain  
That you feel  
Maybe tomorrow won't be so bad  
I know it

'cause  
I once felt that way  
Nothing I could say  
Made it go away  
I lived through this  
I still feel this  
I just live for my tomorrow

Just make it go away  
Just make it go away  
She'll make it go away  
She'll make it go away
