

# Into the Black Hole

Star One

A dark sphere surrounds us

Surreal...oblivious...

In the centre of the galaxy  
A hidden force has found us

Powerful...mysterious...

At the boundary of eternity

Aaaaahhhh  
Aaaaahhhh  
Aaaaahhhh  
Aaaaahhhh

Nothing escapes, not even light  
Beyond the mystical horizon  
We surrender to its might  
Gazing into the eye of the universe

A deep roar is sounding

Deafening...thunderous...

As if the universe were crying  
My heart is pounding

Frantic...delirious...

My every nerve is dying

Aaaaahhhh  
Aaaaahhhh  
Aaaaahhhh  
Aaaaahhhh

Nothing escapes, not even light  
Beyond the mystical horizon  
We surrender to its might  
Gazing into the eye of the universe

I hear screams of fallen souls, sad cries of agony  
Within the void of this evil hole, deep inside the black

Could it be my imagination, the mirror of my fantasy?  
A fear-induced hallucination  
Or is there no way back from the halo of darkness?

Spirits - apparitions - misery - suffering  
Horrid dreams and dire visions rising up from the black

Look away in disbelief, this cannot be happening  
The end has come, I bow in grief  
There is no way back from the halo of darkness

Now silence devours us

Massive...suffocating...

The calm before the storm  
Gravity overpowers us

Invincible...dominating...

And leads us through the final door

Aaaaahhhh  
Aaaaahhhh  
Aaaaahhhh  
Aaaaahhhh

Nothing escapes, not even light  
Beyond the mystical horizon  
We surrender to its might  
Gazing into the eye of the universe

Feed me light, I'm the halo of darkness  
Feel my might, I'm the eye of the universe  
Feed me light, I'm the halo of darkness  
Feel my might, I'm the eye of the universe
