

## Set Your Controls

Star One

Welcome aboard, let me draw you deep inside  
The dark caves of my twisted mind  
Welcome aboard, take a seat and dim the light

Empty your mind, sit back and hold on tight

Break away through the walls of reality  
Enter the realm on the other side  
Break away from the cold rationality  
Now is the time to open up your mind

Set your controls  
Enter a date and see what our future holds  
What kind of fate awaits us there in the night  
As we dissolve into the light

Set your controls  
Enter a place and witness mysteries unfold  
Dangers we'll face as our engines ignite  
Blazing our way into the light

Set your controls

Throw the switch, get ready for some turbulence  
Brace yourself with all your might  
Throw the switch and tempt the laws of providence

Empty your mind, sit back and hold on tight

Turn the dials and watch the years go by  
Light years away, far beyond our sun  
Turn the dials, into the void we fly  
There's no way back once it has begun

The die is cast  
You fade to black  
Forget the past  
There's no way back
