

Get Over It

Stars Go Dim

How does it feel? To be the one to cry All alone and left to die
How does it feel? To know that all your love was wasted on the
good time And I don't care if your sorry and you missed me now
And I don't care if your lonely and you need me now.

So baby get over it That's what you told me When I thought that
I was the only one Forever was nothing but having fun You need
to get over it Try not to take it so hard Try to keep from making
a fool of yourself I took your advice and I found someone else

Get over it

Give it some time and your heart will find a reason to get over
mine Love is a crime At least that's what you said It's crazy
how your words come back to haunt you for the rest of your life
And leave you with nothing but hopeless wishing you were mine

So baby get over it That's what you told me When I thought that
I was the only one Forever was nothing but having fun You need
to get over it Try not to take it so hard Try to keep from making
a fool of yourself I took your advice and I found someone else

And I told you that it would end like this And I told you that
you would have regrets But it's funny how you come running back
to me Acting like you never left or even missed a beat Now you
swear that you are so in love And you tell me that I am the only
one But I'm sorry I don't see a life with you I just can't take
this anymore

So baby get over it That's what you told me When I thought that
I was the only one Forever was nothing but having fun You need
to get over it Try not to take it so hard Try to keep from making
a fool of yourself I took your advice and I found someone else
