

From the Night

Stars

From the night
From the opposite side of the light
From the twin planet we never see
From downtown eternity

From the night
From the empty and glittering towers
From the faces you glimpse through the glass
From all of the dead hours

From the night
Is a message to all of you sleeping
Every dream in your head as you lie in your bed is worth keeping

And she said
I don't care if we never come back from the night
I don't care if we never come back from the night
I don't care if we never come back from the night
I don't care if we never come back from the night

From the night
Even though we're all scared when it's gone
In the morning you'll wake up and make up yourself and move on

60 flights
60 setting suns in my rear view
And the thousands of infinite hours since I last saw you

Let's be young
Let's pretend that we never will die
Let's imagine no one is lost it's not easy but we got to try

And she said
I don't care if we never come back from the night
I don't care if we never come back from the night
I don't care if we never come back from the night
I don't care if we never come back from the night

From the night...

From the night...

There's a person who looks like you
There's a person who looks like you
There's someone waiting for you
And they're from the night

Midnight out on the floor
It's 2 then 3 then 4
And then we're walking home
I wanna be with you don't wanna be alone

There's a person who looks like you
There's a person who looks like you
There's someone waiting for you
And they're from the night

Midnight out on the floor
It's 2 then 3 then 4
And then we're walking home
I wanna be with you don't wanna be alone

And she said
I don't care if we never come back from the night
I don't care if we never come back from the night
I don't care if we never come back from the night
I don't care if we never come back from the night
