

My Favourite Book

Stars

I was always late, you never afraid, that we could be falling
All our friends would say, maybe we should wait, but they can't
see what's coming
And to this day, when everything breaks, you are the anchor tha
t holds me

And that is why we'll always make it

How I know your face, all the ways you move, you come in, I can
read you
You're my favourite book
All the things you say, the way you shift your eyes
I never knew there was someone, to make me come alive

When the days are long, and the thunder with the storm, can alw
ays get me crying
You can make my bed, I'll fall into it, shattered but not lonel
y
Because I never knew a home, until I found your hands, when I'm
weathered
You come to me, you're my best friend

And that is why we'll always make it

How I know your face, all the ways you move, you come in, I can
read you
You're my favourite book
All the things you say, the way you shift your eyes
I never knew there was someone, to make me come alive

And when we're making love
I'd give up everything for your touch

How I know your face, all the ways you move, you come in, I can
read you
You're my favourite book
All the things you say, the way you shift your eyes
I never knew there was someone, to make me come alive

When you go to work all the day I wait
For you to come home, recount our time, in our little place
