

# Trap Door

Stars

We're back with the fear  
Feels good to be here  
Neurotic alcoholic  
Make mine the gin and tonic

The kids in VIP are really making me angry  
With lines around the block and inside the place it's empty  
So step to the right, give up the fight  
When you're standing in the dark it's hard to see the light

One more, one more, and they close that door  
He told me he was young, I said "well what is that good for?"  
Nobody stays that way, and day after day  
All you get is the stick while you're waiting for your pay  
Trap door, trap door, in the ceiling and the floor  
Disappear, disappear, everybody feel the fear  
You always did the things they told you to  
You always bought that shit they sold you, sold you

I'm back with the hate, so sorry I was late  
Yeah my name was on the list  
But they said I had to wait  
The kids in VIP are all looking for a family  
Their teeth are made of gold but their wallets are empty  
So step to the right, don't give up the fight  
Yeah we're standing in the dark but we're looking for the light

One more, one more and they close that door  
He told me he was young, I said "well what is that good for?"  
Nobody stays that way, and day after day  
All you get is the shit while you're waiting for your pay  
Trap door, trap door in the ceiling and the floor  
Disappear, disappear, everybody feel the fear  
You always did the things they told you to  
You always bought that shit they sold you, sold you

Trap door, trap door in the ceiling and the floor  
Disappear, disappear, everybody feel the fear  
You always did the things they told you to  
You always bought that shit they sold you

One more, one more and they close that door  
He told me he was young, I said "well what is that good for?"  
Nobody stays that way, and day after day  
All you get is the stick while you're waiting for your pay

Trap door
