## **White Light**

Starsailor

There's a white light that carries me home Helps me focus when I am alone Keeps on teaching me how to be loved And to love
And to love

Onwards to forever Our minds belong together

She's the good light that carries me on Helps me focus on where I've gone wrong Now you've reached me
Its time to forgive and forget
And forget

Onwards to forever Our minds belong together Onwards to forever Our minds belong together

Tonight, this land Belongs to me The shifting sands The shining seas

Onwards to forever Our minds belong together Onwards to forever Our minds belong together

Tonight, this land Belongs to me The shifting sands The shining seas

Won't you help my soul to grow? To heal, its all that I know
