

# Dark On Me

Starset

There's no hate,  
There's no love  
Only dark skies that hang above  
I call your name as I walk alone  
Send a signal to guide me home

Light the night up, you're my dark star  
And now you're falling away

But I found in you what was lost in me  
In a world so cold and empty  
I could lie awake just to watch you breathe  
In the dead of night, you went dark on me

You're the cause,  
The antidote  
The sinking ship that I could not let go  
You led my way then disappeared  
How could you just walk away and leave me here?

Light the night up, you're my dark star  
And now you're falling away

But I found in you what was lost in me  
In a world so cold and empty  
I could lie awake just to watch you breathe  
In the dead of night, you went dark on me

Blinded, I can't do this on my own  
You were all I've got, to guide me home

I could lie awake just to watch you breathe  
In the dead of night, you went dark on me

Dark on me, dark on me  
Dark on me, dark on me  
Dark on me

I could lie awake just to watch you breathe  
In the dead of night, you went dark on me
