

Darkening skies, coming this way
Falling behind, into nothing

If you lead, I will follow
A thousand miles away
I will be, your Apollo
Alone in outer space

Satellite, shine on me tonight
I'll feel your gravity, I'll stay and never leave
My satellite, I'm here tonight
Shine your light and set me free
Take the darkness out of me
Shine on me

Shine on me

Blinded I wait, end if forming
You are my fate, give me warning

If you lead, I will follow
A thousand miles away
I will be, your Apollo
Alone in

Satellite, shine on me tonight
I'll feel your gravity, I'll stay and never leave
My satellite, I'm here tonight
Shine your light and set me free
Take the darkness out of me
Shine on me

Shine on me

Fall across the emptiness, and walk the night
Deserves the silence in the dark, and left behind
I seek the stars above the world to be the guide
They are pale against the light in your eyes

In your eyes...

And once I pass I know that you are too late
But I can feel you coursing through beyond the space
Just send your energy to me and I'll push on
Send your signal out, and bring me back to you

Satellite, shine on me tonight
I'll feel your gravity, I'll stay and never leave
My satellite, I'm here tonight
Shine your light and set me free
Take the darkness out of me
Shine on me

Shine on me
