Night Terrors

In time I'll get this out of Get this out of Out of my mind Where am I? I cant see I fear for my life Fear of this fright

They haunt me And they taunt me Try to relax Let it happen My hopes turn to crystal matter Watch them shimmer As they shatter

Night terrors in my mind Thoughts i cannot hide Dreams that play on my cold fears Night terrors in my head Am I really dead? I cant tell, it feels so real

Remember what you once said? Every passing fragile moment Is another chance to turn it around I want to try to work it out

Night terrors in my mind Thoughts i cannot hide Dreams that play on my cold fears Night terrors in my head Am I really dead? I cant tell, it feels so real

Get out of my mind Get out of my head I wish you were dead I cant take it Get out of my mind Get out of my life I'll curse you tonight I just cant take it anymore
