Heart On Hold

Status Quo

```
You have the technology
You are in control, you know all the angles
Forget your trigonometry
Please release my soul, please undo this tangle
You have the power remote control
One look from you and my blood runs cold
You've put my heart on hold, freeze frame
You've put my heart on hold, freeze frame
You've put my heart on hold

You had compatability
You're not giving in, you're not user friendly
There's every possibility
We can make a spark with the right connection
I need your wiring diagram
I need to break into your programme
You've put my heart on hold, freeze frame
You've put my heart on hold, freeze frame
You've put my heart on hold

You know the terminology
You leave me behind, I could use some training
Equipment is top quality
I'll supply the base, you supply the software
It's done by numbers, or so they say
So one plus one equals two today
You've put my heart on hold, freeze frame
You've put my heart on hold, freeze frame
You've put my heart on hold, freeze frame
You've put my heart on hold, freeze frame
You've put my heart on hold, freeze frame
You've put my heart on hold, freeze frame
You've put my heart on hold, freeze frame
You've put my heart on hold
```
