

## Leave a Little Light On

Status Quo

Remember back, when you were young  
your mother said "that's quite enough"  
so sleep tight don't let the bedbugs bite  
goodnight my child

You didn't know true or false  
the star is heard when the darkness falls  
and under your door, creatures would squeeze  
and you always had to shout "Mama please..."

Leave a little light on,  
a little light on  
leave a little light on for me  
Leave a little light on,  
a little light on  
leave a little light on for me  
Leave a little light on,  
a little light on  
leave a little light on for me  
Leave a little light on,  
a little light on  
leave a little light on for me

So in love, couldn't ask for more  
a hungry romance hey, you know the score  
it was destiny, we had to meet  
and I could hardly walk for one whole week

Coming up, she looked outta town  
miles from nowhere, broken down  
in the wind and rain lost without a clue  
searching for a phone so I could tell her too

Leave a little light on,  
a little light on  
leave a little light on for me  
Leave a little light on,  
a little light on  
leave a little light on for me  
Leave a little light on,  
a little light on  
leave a little light on for me  
Leave a little light on,  
a little light on  
leave a little light on for me

When I get old, it's time to go  
what body and ailments  
still playing shows  
I'll be safe and sound for eternity  
So Mr God, when you're ready for me

Leave a little light on,  
a little light on  
leave a little light on for me  
Leave a little light on,  
a little light on

leave a little light on for me  
Leave a little light on,  
a little light on  
leave a little light on for me  
Leave a little light on,  
a little light on  
leave a little light on for me

Leave a little light on,  
a little light on  
leave a little light on for me  
Leave a little light on,  
a little light on  
leave a little light on for me  
Leave a little light on,  
a little light on  
leave a little light on for me  
Leave a little light on,  
a little light on  
leave a little light on for me
