

## You Know How It Is

Stavesacre

It's been too safe It's been too safe for too long  
So little reaction to get it better right or wrong  
And I'm feeling restless here good intentions and barbed wire  
I want to go elsewhere and set this place on fire  
No one move

No one move  
No one move

No one move  
We just want to know whats been waiting just outside  
And were looking for the heat and sweat, restless tears, sincerity  
These walls are cold from flames that give off only light  
Can't be content with less than everything

No one move  
No one move  
No one move  
I want to keep my eyes on you  
No less than everything  
No less than everything

No less than everything  
Set this place on fire

No one move  
No one move  
No one move  
No one move

I want to keep my eyes on you
