## **Create Your Fate**

## Steadman

Create Your Fate
If you say nothing will be coming your way
What may come you chase it away
Create you own fate

If you smile something in the worlds gonna change Something in you won't be afraid Create your own fate

Will you be missed when you are gone?
If something shifts do you take too long?

You're feeling so misunderstood It's like an endless ocean you count to ten but it's no good You find you're wasting your time But doesn't it feel good

Is it late nothing comes to us on a plate No thank you I already ate Create your own fate

Will you be missed when you are gone?
If something shifts do you take too long?

You're feeling so misunderstood It's like an endless ocean You count to ten but it's no good You find you're wasting your time But doesn't it feel good
