

# Found My Way To You

Stealers Wheel

I was alone, I was so tired, down to my bones.  
And you know everything, every little moment had lost its ring.

I found my way to you, you came right out the blue,  
And that was all you had to do, and I knew.  
I couldn't get you out of my mind, you know I reached you just  
in time,  
I found my way to you, and it's true.

Rise up everyday, it felt like you were a million miles away.  
And I lie down every night, I needed you beside me to make it right.

I found my way to you (found my way to you),  
I found my way to you (found my way to you),  
I found my way to you (found my way to you),  
And it's true...

I found my way to you (found my way to you),  
I found my way to you (found my way to you),  
I found my way to you (found my way to you),  
And it's true...
