

Starlight Star-Shine

Steam Powered Giraffe

Starlight, starshine, please come back into my life
You left me all alone, can't you see that my heart's your home
There's a void in my soul (and it leaves me feeling cold)
Will I ever find peace from it's tolls

Starlight, starshine, all of my mind couldn't unwind
What it was, what it'll be, what future can I hope to see
I am not in a dream (and there's no reason to scream)
And this is not the end, or so it seems

You were like starlight, just like starshine
Casting down on me
When the light would go down and the darkness was found
You would shine hope to me

Starlight, starshine, no longer do you shine so bright
The sun frowns, the moon sighs, sad is the universe through my eyes
I am not just a machine (through my heart I will sing)
I'm just a person holding onto a dream

You were like starlight, just like starshine
Casting down on me
When the light would go down and the darkness was found
You would shine hope to me

You were like starlight, just like starshine
Casting down on me
When the light would go down and the darkness was found
You would shine hope to me
