

Helicopter

Steel Train

I am somewhere in the city climbin' up a fire escape
See i am somewhere in the city climbin' up a fire escape
You know i got to save my baby from the mess that this world has made

Oh i arrive through a window
Leave through a hole in the wall
See i arrive through a window
Leave through a hole in the wall
You know i got to save my baby as i carry her cradle and all

Helicopter, helicopter
Let your long rope down
You see i swing beneath the sunset
Done all that i can do in your town

Violence has taken wind out of my sails
Violence has taken wind out of my sails
You know i got to save my baby from the mess that this world has made

Helicopter, helicopter
Let your long rope down
You see i swing beneath the sunset
Done all that i can do in your town

I am somewhere in the city climbin' up a fire escape
See i am somewhere in the city climbin' up a fire escape
You know i got to save my baby from the mess that this world has made
