

School Is For Losers

Steel Train

Can you pull me out i think, i might, i think im drowning
There was a cool boy, there was a clown, i was alone
And that boy he told me just to give it all up now
Just playing the fool, he wanted me too
Im not going back to school

I took that van to austin, dallas texas, mobile alabama
I slept sound, and in that way i never really came home
When you leave yourself on the side of that highway
Forever you run, forever free slaves

I will say whoa, tornado in the sky
I know, i know you want it to
But i dont want to blow away without you
Ill, follow into the night
Come on, come on swim there with me
I tell you what i want, I want a summer tll the sun burns

Can you pull me out i think im drowning
There was that cool boy he did fall way down that hole
Do you see me down that highway
You're home from school, playin that fool

I will say whoa, tornado in the sky
I know, i know you want it to
But i dont want to blow away without you
Ill, follow into the night
Come on, come on swim there with me
I tell you what i want, I want a summer tll the sun burns out
