One plush summer you come to me ripe and ready And bad through and through With that deep mystical soul synergy pumping steady Between me and you

Lovin' all the beautiful work we've done cara mia And it's barely July If we keep on boppin' until Labor Day Li'l miz Abbie bye

What will it be some soothing herb tea? That might be just the thing Let's say we spike it with Deludin Or else, maybe tonight a hand of solitaire

Flame is the game
The game we call gas lighting Abbie
It's a luscious invention for three
One summer by the sea

With the long weekend that's comin' up fast
Let's get busy
There's just too much to do
That black mini looks just like the one she's been missin'
Feels good on you

There's a few items we need in town, allez-vous girl There's no time to waste Such as fresh cable and fifteen watt bulbs Couple dozen, it's a big old place

Let's keep it light, we'll do a fright night With blood and everything Some punky laughter from the kitchen And then, a nice relaxing hand of solitaire

Flame is the game
The game we call gas lighting Abbie
It's a luscious invention for three
One summer by the sea

You can choose the music
I'll set up my gear
Later on we'll chill and watch the fireworks from here

How can you knock this mighty spite lock Check out the work itself A mix of elegance and function That's right, a tweak or two and then she's out of here

Flame is the game
The game we call gas lighting Abbie
It's a luscious invention for three
One summer by the sea
