

Freak Out

stellastarr*

We can build a house
Across another universe
That we'll know
And we'll reverse the drought
And bring another kind of people
To our show

We can freak out freak out
Come on hit me with the street lights tonight
I only like it when you freak out freak out
Come on hit me with the street lights tonight
I always hear you when your gone

Come on your on fire
Another syndication dies
In your eyes
Another psychedellic choir
And your dizzy from the drugs
In your hand
And then my love
Our lives are just a picture frame
And in the end
I never heard your voice
So turn

We're talkin bout a freak out freak out
Come on hit me with the street lights tonight
I only dig it when you freak out freak out
Come on hit me with the street lights tonight
I always hear you when you fall
I always hear you when

We can build a sun
There's never been a place on earth
Where we can try to run
I wanna help you when u kill with the hurt
And our lives are just a picture frame
And in the end
I never heard your voice
So turn

We're talkin bout a freak out, freak out
Come on hit me with the street lights tonight
I only dig it when you freak out, freak out
Come on hit me with the street lights tonight
I always hear you when you're gone
I always hear you when you're gone

(Freak out, Freak out)
