

# Light Up The World

## Steps

If you wish upon the stars  
Will they give you all you ask?  
You never know, you never know  
If you wander from the path  
Will you come to any harm?  
You never know, you never know

Got the key to fit the lock  
Time to stop the clocks  
Leave the fear behind

We can light up the world  
With the secret we're keeping, I know you believe it  
Light up the world  
With the secret we're keeping, I know you believe it

Do you cross your heart  
Does it make you who you are?  
You never know, you never know  
If the spark becomes a flame  
Would it warm, or cause you pain?  
You never know, you never know

Got a key to fit the lock  
Time to stop the clock  
Leave the fear behind

We can light up the world  
With the secret we're keeping, I know you believe it  
Light up the world  
With the secret we're keeping, I know you believe it

Imagination will set you free  
Everything isn't all that it seems  
Just gotta break it down, just gotta work it out  
Then you'll understand, you're gonna understand

We can light up the world  
With the secret we're keeping, I know you believe it  
Light up the world  
With the secret we're keeping, I know you believe it
