

# Neon Blue

## Steps

You were the life and the soul  
Every party that we used to go  
Baby all of the dancefloors you touched  
You could turn them into gold

Thousands of stars in the night  
Would jealous you can shine so bright  
Now I'm missing your laugh and your glow  
We'll rest untill you let me know

So baby change your mind  
Leave that broken heart behind  
Cause the night is young  
So let it bring you back to life

Come out, come out, and dance with me  
If you're down its the remedy  
Cause all we need is me and you  
In neon blue

Come as you are, cause you're great  
And you don't need to change a thing  
All your tears and your troubles can wait  
And we don't need to let them win

I know that you remember  
When you hear the music play  
All those times together  
Baby don't say its too late

When lights in the night call your name  
They're waiting there for you to walk in

So baby change your mind  
Leave that broken heart behind  
Cause the night is young  
So let it bring you back to life

Come out, come out, and dance with me  
If you're down its the remedy  
Cause all we need is me and you  
In neon blue

Come out, come out, and dance with me  
If you're down its the remedy  
Cause all we need is me and you  
In neon blue

Come baby,  
Take my hand and hold me tight  
And don't you ever let me go

Come out, come out, and dance with me  
If you're down its the remedy  
Cause all we need is me and you  
In neon blue

Me and you in neon blue  
Me and you in neon blue

Cause all we need is me and you in neon blue...  
Is me and you in neon blue...
