

Chemistry

Stereo Skyline

Oh oh oh.
Yeah, what's the chance of you and me?
The two of us in a make believe.
3D movie let's subtract the
math and talk about chemistry.

She still counts on her fingers sometimes,
but she looks oh, so fine by my side.
Well isn't she something?
I just can't stop humming: No, ohh.

And, maybe girl you rock my world,
flip, turn it upside down and inside out.
Feeling just fine like we should alright,
rolling out of bed just to do it all again.
Grab my shoes and walk right out the door,
yeah girl I couldn't ask for more

Oh oh oh
Let's forget about math and history
The Milky Way, the galaxy, the gravity
that's pulling you like glue right towards me

And, maybe girl you rock my world
flip, turn it upside down and inside out
feeling just fine like we should alright
Rolling out of bed just to do it all again.
Grab my shoes and walk right out the door,
yeah girl I couldn't ask for more
'Cause the gravity keeps happening
to disappear when you are near
But you seem to be what's making
me miss a beat.

And, maybe girl you rock my world
flip, turn it upside down and inside out
And, maybe girl you rock my world
flip, turn it upside down and inside out
feeling just fine like we should alright
Rolling out of bed just to do it all again.

And, maybe girl you rock my world
flip, turn it upside down and inside out
feeling just fine like we should alright
Rolling out of bed just to do it all again.
Grab my shoes and walk right out the door,
yeah girl I couldn't ask for more.
