

Change Changes Things

Stereophonics

Change changes things
Change changes you

A change in the weather
A change for the phone
A change of direction
Could change where is home

Time changes lovers
People changing mind
Leaves changing colors
And lies changing lives

Change of a record
Sing me something blue
A change in your job
Or did your job change you?

Children change a marriage
Change is something new
Money changes everything
But it doesn't improve your view

You can change
You can change

Change changes things
Change changes you

The change in your pocket
Or pocket all your change
Change your opinion
Change for staying just the same

Change your wife
Or your wife can change you
Change your life
And your life chains who?

People change their sex
People change their hair
Change over chance
From here to over there

A change for the better
But you got too much to lose
Change your religion
Well it depends on you

You can change
You can change
You can change

Change changes things
Change changes you
