Stereophonics

Thinking about thinking of you.
Summertime think it was June
Yeah think it was June.
Laying back, head on the grass.
Children grown having some laughs
Yeah having some laughs.

You made me feel like the one
You made me feel like the one
The one
You made me feel like the one
You made me feel like the one
The one

Drinking back, drinking for two
Drinking with you
And drinking was new
Sleeping in the back of my car
We never went far
Don't need to go far

I don't know where we are going now
I don't know where we are going now

Wake up cold coffee and juice
Remembering you
What happened to you?
I wonder if we'll meet again
Talk about us instead
Talk about why did it end

I don't know where we are going now
I don't know where we are going now
So take a look at me now ...

Made me feel like the one
Made me feel like the one
The one
Made me feel like the one
Made me feel like the one
The one

Drinking back, drinking for two
Drinking with you
And drinking was new
Sleeping in the back of my car
We never went far
No need to go far

I don't know where we are going now
I don't know where we are going now
