

# Don't Let the Devil Take Another Day

Stereophonics

I looked high up at the aeroplane  
And I thought of all the places I could fly away  
I never noticed the lights had changed  
And I crashed my car  
And I didn't get far  
In the morning rain

And then I turned around  
I thought I must have been dreaming  
For some better days

Heaven help me, darling  
Won't you help me heal my mind?  
Don't let the devil take away another day  
Stay, lady, stay  
Let's take a walk, just stick around  
I don't wanna let the day get away

You set me free, you're my great escape  
And I dream of all the places we could hide away  
I never noticed the night from day  
And we talked all night  
Till the candlelight  
Burned out its flame

And then we walked around  
My feet back on the ground  
Dreaming for some better days

Heaven help me, darling  
Won't you help me heal my mind?  
Don't let the devil take away another day  
Stay, lady, stay  
Let's take a walk, just stick around  
I don't wanna let the day get away  
Oh

Heaven help me, darling  
Won't you help me heal my mind?  
Don't let the devil take away another day  
Stay, lady, stay  
Let's take a walk, just stick around  
I don't wanna let the day get away  
Oh, oh, oh, don't let the day  
Yeah, I don't wanna let the day get away
