

Forever

Stereophonics

Sun beats down on my mind on a Friday morning
Driving round on a sea ask to the sky so why
Took for granted all the things I forgot I know
Slapped in the face kneeled me down out of control

I'd like to know where I'm supposed to go
Wish I could fly away forever
Wish I could take your pain from you and release you

Dream of ways losing days
How could we hope to fight this?
Seasons change leaves fall
On the frozen ground

Like a rock standing tall only way to play
I get you through you will grow into a shooting star

I'd like to know where I'm supposed to go
Wish I could fly away forever
Wish I could take your pain from you and release you
Wish I could fly away forever
Wish I could take your pain from you and release you

We'll fall down, we'll fall down
Don't know how, don't look down
This dream of where's to
Keep on keeping on till dawn

Fly away forever
Wish I could take your pain from you and release you
