

Nights Like This

Steve Azar

Moonlight layin' softly on white lace
Perfume in the air, roses in a crystal vase
Sweet words you're whisperin'
And your breath against my skin
My hands are tremblin' as I reach out for you
Shadows dance, magic fills the room

Nights like this
I live for
Nights like this
When we close the door
The whole world fades away
With the tender love we make
On nights like this

One by one the stars give in to dawn
The candles burnin' low
But we're still holdin' on
I kiss you one last time
As you press your heart to mine
With every beat I find myself more and more in love
And all my days filled with sweet dreams of

Nights like this
I live for
Nights like this
When we close the door
The whole world fades away
With the tender love we make
On nights like this

The whole world fades away
With the tender love we make
On night like this

Nights like this
