

# Us Against The World

Steve Harris

Promises made out of fright  
Hands held tight all is calm tonight  
I came here looking for a friend  
To start again and it's goodbye my love

And everything went wrong today  
I close my eyes but you won't go away  
And we were raised to do what's right  
And not react to whatever's thrown at us  
And these games that we play...

Together we try and together we cry  
It's us against the world  
The hurt that they give 'cause we're licensed to live  
It's us against the world

A gunshot echo in the night  
No end in sight  
I'm in the hands of luck  
Came here for some peace of mind  
Would you be kind  
And help me on my way

And everything went wrong today  
I close my eyes but it won't go away  
And we were raised to do what's right  
And not react to whatever's thrown at us  
And these wars that we wage...

Together we try and together we cry  
It's us against the world  
The hurt that they give 'cause we're licensed to live  
It's us against the world

Sister and brother father and mother  
Something has got to give can't go much further  
And these games that we play...

Together we try and together we cry  
It's us against the world  
The hurt that they give 'cause we're licensed to live  
It's us against the world

Together we try and together we cry  
It's us against the world  
The hurt that they give 'cause we're licensed to live  
It's us against the world
