

## Cold Kisses

Steve Holy

Under the stars Spanish guitars  
Sing the Santa Maria outside my room  
The music's playing on a sweet bougainvillea breeze  
Romantically oh, but not for me

There's a ring of ice around the moon  
And it's making me shiver  
It seemed so warm when I had you  
But all the others I've known  
Leave me chilled to the bone  
Baby, since you've been gone  
All I'm left with is cold kisses

My pride has tried to build a fire  
That's as bright as your memory  
But I can't give what has been given  
I just don't have it in me now  
I'm all closed down and the fire's burned out

There's a ring of ice around the moon  
And it's making me shiver  
It seemed so warm when I had you  
But all the others I've known  
Leave me chilled to the bone  
Baby, since you've been gone  
All I'm left with is cold kisses

Like a rose in the snow  
That won't bloom and can't grow

There's a ring of ice around the moon  
And it's making me shiver  
It seemed so warm when I had you  
But all the others I've known  
Leave me chilled to the bone  
Baby, since you've been gone  
All I'm left with is cold kisses

Cold kisses, cold kisses
