Extinction Blues

Steve Lukather

World of fear
Dying sun
Amber tears
Wars to be won
World grown old
Lost to man
All alone
All but forgotten

Same extinction blues You've heard before the Same old news

You and I
Last chance
Age of ice
Frozen romance
Time repeats
Death to life
Heartbeats
Save us tonight

I got the same extinction blues The same old news Extinction blues

It's great to be optimistic
And look at the world
Through rose colored eyes
Tell you what not to wish for
Mountains don't move
When you want them to

Same extinction blues You've heard before The same old news Extinction blues
