Lost in Your Eyes

Steve Miller Band

So you found someone You found some heartache You found some fun You had some give and take You had a friend You had a fight You saw it end And then you're up all night Have you seen the way she walks The way she smiles at me Laugh a while and talk a lot And you're beginning to see That you get lost in her eyes She takes you away You start to talk And time it flies She takes you away She takes her time and leads you on And then she lets you go Time to time she'll lead you on And then she'll let you know Then you get lost in her eyes She takes you away You start to talk And time it flies She takes you away Then you get lost in her eyes She takes you away You start to talk And time it flies She takes you away You found someone You found some heartache You found some fun You had some give and take You had a friend You had a fight You saw it end But that's alright Have you seen the way she walks The way she smiles at me Laugh a while and talk a lot And you're beginning to see That you get lost in her eyes She takes you away You start to talk

And time it flies She takes you away Tištěno z www.txp.cz
