Ride This Rocket

Steve Wariner

Hey, Hey, what planet are we on Everything seems wrong Hey Hey tired of trying to survive Living half alive.

I'm ready to ride this rocket baby come with me To the other side of heaven our own galaxy A million miles from anywhere All we need is out of here Let's go put some stardust in our pocket Ready to ride this rocket.

Someday wrong will turn to right We will win this fight But today all I wanna do Is just get away with you.

I'm ready to ride this rocket baby come with me To the other side of heaven our own galaxy A million miles from anywhere All we need is out of here Let's go put some stardust in our pocket Ready to ride this rocket.

Turbo on this baby blue corvette Red wine a blanket are you set Oh there ain't no way to stop it Are you ready to ride this rocket

Are you ready to ride this rocket baby come with me To the other side of heaven our own galaxy I'm choking in this atmosphere All we need is out of here Let's go put some stardust in our pocket Are you ready to ride this rocket...
