

That's Just What Happened To Me

Steve Wariner

Boy meets girl one perfect night
Just for a moment all the stars line up right
I'm not saying that's the way love always has to be
That's just what happened to me

One little kiss two people touch
I never knew three words could say so much
Cause you don't expect a dream to become reality
But that's just what happened to me

The lucky few find a love that's just fate
And time makes the rest of us fools
I never thought till the day that I met you
I'd ever be the exception to the rules

How could I know
That wishes come true
That someone like me
Could ever find someone like you
To have this kind of love
Is impossible you see
But that's just what happened to me

That's just what happened to me
