

# While There's a Candle Burning

Steve Winwood

You used to come and see me all the time  
I gave you everything I had  
I brought you up  
And I never left you one time feeling bad  
They say it's a new age  
And I wonder where you've been  
You can help me turn a new page  
The same door is open-come on in

While there's a candle burning  
I'll be reaching for your heart  
While there's a wheel still turning  
I know how to play my part  
So I keep the wheels all turning  
And I keep the candles burning  
All day through here for you

The world is full of players in the night  
They say the words they have to say  
They're all so hot  
And they never give a damn for yesterday  
Don't care if they touch you  
Everywhere you saved for me  
'Cause I still know how to move you  
I still know how to rock you-come and see
