

# Signs Of Life

Steven Curtis Chapman

Come in base I've landed my ship on a planet here in space  
This is the one they say is inhabited by the human race  
And I'm going out to look around and see what's here  
And I'll tell you what I find  
Confirmation on the inhabitants they're running everywhere  
And their technology is beyond what I've seen anywhere  
But I'm trying to communicate and they don't hear me  
It seems like for all I'm finding  
I can't find the most important thing

Where are the signs, where are the signs of life  
The love that proves there is a beating heart inside  
Where are the signs, where are the signs of life  
The compassion and concern that makes this world turn  
Where are the signs of life

Now, I've got crayons rolling around in the floorboard of my car  
Bicycles all over my driveway, bats and balls all over my yard  
And there's a plastic man from outer space sitting in my chair  
The signs of life are everywhere  
But I've got questions rolling around in the corners of my mind  
If it's true I live in a world where hope has all but died  
And if I really have a living love alive in me  
How am I letting it be known, how am I letting it be seen

These are the signs, these are the signs of life  
The love that proves there is a living faith inside  
These are the signs, these are the signs of life  
The compassion and concern that makes this world turn  
These are the signs of life

[Solo]

These are the signs, these are the signs of life  
The love that proves there is a living faith inside  
These are the signs, these are the signs of life  
The compassion and concern  
That's gonna make this world keep turning  
These are the signs of life  
A love that's flowing from the heart  
Where the grace of God has left its mark  
These are the signs of life  
The reaching out of a servant's hand  
The giving that makes no demands  
These are the signs of life  
This is loving proof of the faith inside  
These are the signs of life
