

Party Your Body

Stevie B

Party your body
Oh pretty lady
Come and have a dance with me
And in a while your body will surely see
I am the one that makes you want more and more
So pretty lady head on to the dance floor
Don't you believe I can rock your body
No other man has done before
So come on girl it's time to get our body started
It's time to make me really really rock your world
Don't you believe, I can...

Chorus:

Party your body
I can make you feel right
Party your body
Dancing to the morning light
Party your body
Moving till you want some more
Party your body
Like no one has done before
Don't you believe it
What does it take to get the message through to you
Just rock your body is all I really want from you
Just come to me and soon you will surely see
I'll freak your body
Be a weekend fantasy
Don't you believe I can rock your body
No other man has done before
So come on girl it's time to get our body started
It's time to make me really really rock your world
Don't you believe it, don't you believe it
Well I can..

Chorus

Oh pretty lady
Come and have a dance with me
And in a while your body will surely see
I am the one that makes you want more and more
So pretty lady head on to the dance floor
Don't you believe I can rock your body
No other man has done before
So come on girl it's time to get our body started
It's time to make me really really rock your world
Don't you believe it
