

# You May Be The One

Stevie Nicks

You may be the one  
But you'll never be the one  
You think you'll understand  
But you don't understand  
You may be my love  
But you'll never be my love  
You may take my hand  
You who demands so much

And then there was the kiss  
Right out there in the universe  
How did that happen  
No, it could not have been worse  
You forgot yourself  
It could not have been worse  
You broke my heart  
You broke my heart

I used to love you  
See the light inside of you  
I used to dream that  
You were an angel  
You were an angel  
And I was a starving child

You may have the question  
But you'll never answer to me  
You may have the goodness somewhere  
But you'll never let me see  
You may be the righteous one  
But it won't be right for me  
How it's lasted so long  
It's a mystery to me

I used to love you  
See the light inside of you  
I used to dream that  
You were an angel  
You were an angel  
And I was a starving child

You may cry the tears  
But the tears aren't really for me  
You say it's taken years  
Years of regret and pain  
Forget me not  
He says I'm so afraid  
He says there's no fear in your eyes  
Tell me another lie

I hear the islands calling  
I hear angry words  
Flying across the ocean  
Like some sea birds  
Never stopping  
I feel my blood racing  
I can't believe what you are saying

I used to love you so much

I used to love you  
See the light inside of you  
I used to dream that  
You were an angel

I used to love you  
See the light inside of you  
I used to dream that  
You were an angel  
You were an angel  
And I was a starving child

And we were magic
