## **Look Around**

## **Stevie Wonder**

We are idle strangers Married to our dangers Into space we go to change our ways

Flying to our heavens We are all together Into hell we chase the light of day

Look around and you'll see Ruins of the human history Look around and you'll see Time is only floating in your mind You will find Searching for time Empty is your mind

We are charmed by living Dazzled into giving All the waste we plan to ignore

Coldness is the virtue Measured by the untrue Love is used for something but what for?

Look around and you'll see Ruins of the human history Look around and you'll see Time is only floating in your mind You will find Searching for time Empty is your mind Look around
