

Let The Music Play

Stick Figure

Let the music play
Let that sweet reggae music play
Fire flies lighting up the night sky
Seeing nature is the only thing that doesn't lie
I got directions from the trees
With his leaves he directed me
Sun rising to my right side
Reggae music don't ever compromise
The complications troubling my life
Reggae music always makes me feel alright
Alright alright alright alright alright alright alright alright

(Rest of song was freestyled in one take)

Let that sweet reggae music play
Let that sweet reggae music play
We got the making music playing from the evening
To that early dawn
The sweet music keeps on playing on
I like the Rasta style
I like the reggae smile
Zion many more miles
Many more travel on
Strait out of Babylon
I like the rasta style
And it just me now with this flat line beat
Rocking out on this Kingston Street
And I like to get a "had a dat"
I don't mind when it's time to die
I just keep on getting high
And I let that music play
I like to let the reggae play...YEAH!
