

Pass Me The Sensi

Stick Figure

Living of this earth can be a bit stressful
But I've got the time, I did not come to rescue
Just because everything is not going your own way
Doesn't mean your problems with vanish with some sensi
Doesn't mean your problems with vanish with some sensi
Doesn't mean your problems with vanish with some sensi
Only temporarily, so pass me the sensi

I woke up to the sun in the morning
Looking for adventure when I found my self exploring
It's my passion, my only true love
I look for inspiration from the lord up above
But when I go in inside my room and I begin to write
I find the things I want to say the most are hidden
deep inside
of a secret inspiration that was planted in my brain uh
oh, uh oh ohh
those were the best times of my life, I know your not a
waste of time

The heart of my guitar is invested in my soul
take a bottle and a moment and I wills sing and I will
show
that there's a million other people who can do what I
can do
but when the moment is awaiting I will bring it on home
to you

I learned the best lesson of my life today
He said we can't go on like this
I stood right there and laughed at him
And then we laughed it off
Then we laughed it off
I stood right there and laughed at him
